consulting

Consulting meets aviation expertise

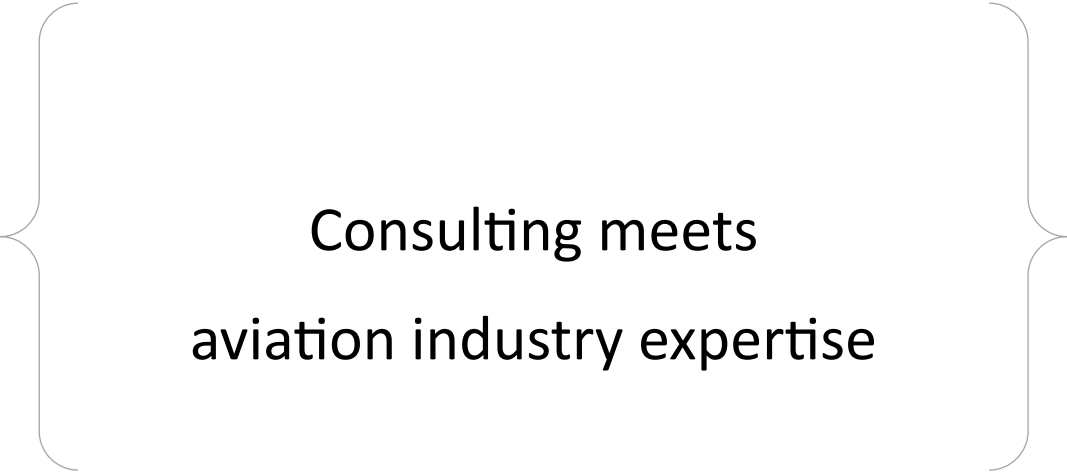

[www.avitradercs.com](http://www.avitradercs.com)

Your access to a combined consulting  
competence and aviation experience.

## Consulting meets aviation industry expertise

AviTrader CS is a management consulting firm, serving the airline and MRO industry. AviTrader CS originates from a 2003 established aviation consulting firm Tamm, Bresler & Associates Inc., with offices in Vancouver, London and Munich.

AviTrader CS is specialized in performance enhancement programs for maintenance organizations by optimizing resource utilization, production processes and the supply chain set-up.

What makes AviTrader Consulting unique is the combination of consulting skills with extensive industry knowledge about the aviation industry.

A strong client relationship requires a strong fundament:  
Long lasting know-how and sustainable results.

## Accelerating the implementation

The team of AviTrader CS understands the complexity of maintenance production processes. Our senior advisers combine over 100 years of operation and turn-around expertise in the airline and MRO industry.

We assess and challenge existing processes and behaviors to identify financial and operational improvement opportunities. Our KPI reporting system allows for ongoing monitoring of your performance to ensure optimal results.

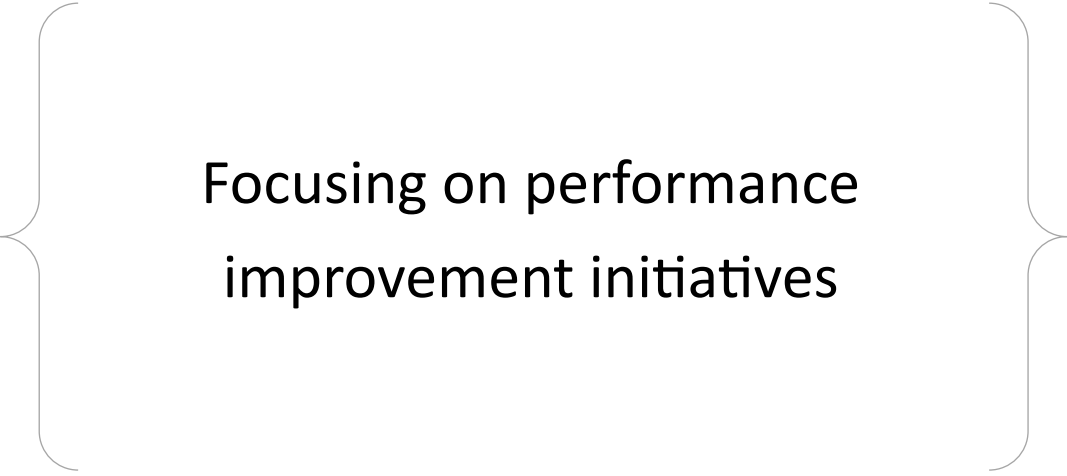

We are the partner of choice when it's about accelerating the implementation of complex performance enhancement and turn-around measures.

We know about the challenges of an aviation executive.

Our service portfolio is tailor-made to harvest  
the hidden performance improvement opportunities.

## Focusing on performance improvement initiatives

Our performance improvement program addresses all technical, operational and commercial aspects to drive financial and operational competitiveness.

- ◇ Production process redesign
- ◇ Support process redesign
- ◇ Lean implementation
- ◇ Digitalization and system
- ◇ Resource planning and utilization
- ◇ Shift system modeling
- ◇ On-time performance management
- ◇ Supply chain optimization
- ◇ Inventory optimization
- ◇ Surplus inventory disposal
- ◇ Vendor management
- ◇ Maintenance program optimization
- ◇ Reporting and KPIs

Combining high quality operational performance  
and reliability with best in practise operating cost.

Therefore, AviTrader Consulting

## Expert competitiveness review

Our projects usually start with a high-level review of our client's organization, processes, efficiency and productivity. During such assessment, we identify strength and weaknesses of the operation and present the findings, recommendations and anticipated saving potentials. This review takes about 2 - 3 days and is provided at no cost.

Our success formula:  
Financial performance driven,  
people oriented and hands-on.

Looking forward serving you
