

Willis Lease Finance Corporation

Power to Spare – Worldwide®

The pioneer in
aviation solutions
for over 40 years

LEASING | TRADING | MATERIALS & SERVICES

The Willis Platform™ leverages its diverse asset base, capital resources, and deep understanding of aviation assets to deliver comprehensive, innovative, reliable solutions to airlines, OEMs and MROs around the world.

The Willis Platform™

PROVIDING A FULL SUITE OF PRODUCT OFFERINGS ACROSS THE AVIATION ASSET LIFE CYCLE

As the largest independent owner and manager of aircraft engines in the world, with roughly 700 owned and managed engines, Willis Lease has successfully purchased, leased and sold more engines in more countries over a longer period of time than any independent competitor. For over 40 years, we have delivered on our promise to provide our customers the most comprehensive, reliable, and innovative fleet solutions, from aircraft and engine leasing, asset management, technical services or any combination.

LET US FIND THE SOLUTIONS THAT WORK FOR YOU.

Willis Lease Finance Corporation ("Willis Lease") brings outstanding capital availability, customer relationships, a worldwide sales force, and an experienced management team, to deliver customer-driven aircraft and engine lease financing solutions. Whether for long-term lease financing for aircraft or engines, short-term access to more than \$2 billion of modern engines, or the knowledge base to craft a customized program, nearly 300 customers in 75+ countries consistently return because of our innovative, reliable service. willislease.com

Willis Aeronautical Services ("Willis Aero") is a leading supplier of surplus engine material to the global aviation and aerospace industries. With over 75 years of deep sector experience, the Willis Aero team delivers surplus parts for nearly every modern engine type to airlines and repair centers around the globe. willisaero.com

Willis Asset Management Limited ("Willis Asset") is at the forefront of innovative engine solutions for asset owners, operators, financiers and MROs. Leveraging decades of engine operating/cost data, power plant management experience, and innovative technology to turn data into measurable customer benefits, Willis Asset offers full fleet management, consulting, and technical services for nearly 700 engines owned and operated by airlines, leasing companies, and OEMs worldwide. willisasset.com

Willis Engine Repair Center ("WERC") is a fully certified EASA/FAA Part145 facility with dual-release capabilities in the US (Florida) and UK (Bridgend). WERC US & WERC UK conduct maintenance services on our owned engine portfolio and third-party assets. Our broad range of capabilities include lease return transitions, C-Checks, borescope inspections, MPD tasks, field service support, boreblend services, and engine storage and preservation, delivered by our highly skilled maintenance teams. werc@williswerc.com

Willis Aircraft Maintenance & Storage ("WAMS") offers expansive aircraft disassembly, storage, and maintenance at Teesside International Airport (UK). Our capabilities include disassembly, short- and long-term aircraft storage and preservation, aircraft light maintenance, and return to service. We provide a full nose-to-tail service tailored to meet the end of life planning and aircraft management needs of our operator, lessor and third-party owner-customers. wams@willisasset.com
